EXPERIENCE

Web Development Immersive

General Assembly, 2018

Bootcamp program focused on computer science fundamentals and building full stack applications. Curriculum covered industry best practices in OOP, server-side MVC architecture, frontend frameworks with REST API, and methods for learning new languages and technologies rapidly.

[Art Education](#) ([GitHub](#)) — *React, Node, Express, Cooper-Hewitt API*

For this project, I learned how to call a third-party API in order to pass relevant data to rendered components in a React frontend application.

[Banking Q&A](#) ([GitHub](#)) — *MongoDB, Express, Handlebars, Node*

I used this project to build a full stack CRUD application. Data can be READ and users can POST, PUT, and DELETE. All data is persisted.

[Flashdance Flashcards](#) ([GitHub](#)) — *HTML, CSS, JavaScript (jQuery)*

The goal of this project was to become familiar with DOM manipulation, event listeners, CSS animations, and JavaScript libraries.

Creative Lead

[Hopkins Brothers LP&D](#), 2016 - PRESENT

Facilitate branding, collateral materials, and web design for real estate development firm. Collaborate with the marketing team to design and produce new project websites, coordinate content production and manage freelance production associates.

Operations Manager

[ComputerCORE](#) Workforce Development Nonprofit, 2014 - 2017

Supervised 100+ volunteers and coordinated a refurbishment program to provide computers and computer skills training to low-income adults. Coordinated IT maintenance, documented program outcomes, managed donations and produced reports in support of \$1M in grant funding.

EDUCATION

BA International Studies

Virginia Commonwealth University, 2013

SKILLS

JavaScript, React/Redux, Node, Express, MongoDB, Handlebars, jQuery, HTML, CSS, Ruby/Rails, SQL, PostgreSQL, Bash, Github, AWS (Solutions Architect, Developer), WordPress, Adobe Illustrator

A LITTLE ABOUT ME

I love art and design and generally have a creative side project, it's currently screen-printing.

I'm an avid golfer with an apartment swing that drives my wife insane.

I enjoy a good puzzle, which is probably why I am attracted to web development; it gives me the opportunity to solve brain teasers and prove that inanimate objects cannot get the best of me.
